Donna Little REGULATIONS COMPILER

STATEMENT OF EMERGENCY

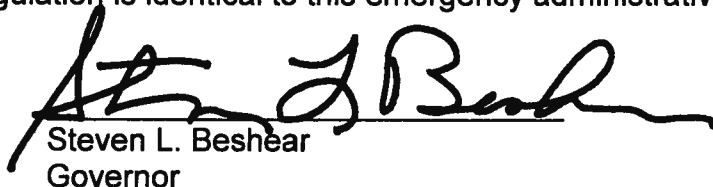

907 KAR 15:060E

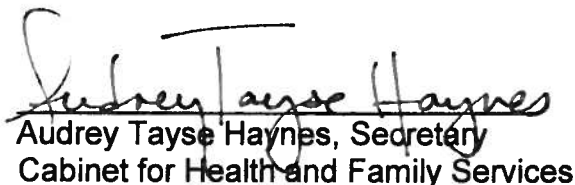

(1) This emergency administrative regulation is being promulgated in conjunction with 907 KAR 15:065E, Reimbursement provisions and requirements regarding targeted case management for individuals with a severe mental illness and children with a severe emotional disability - to comply with a federal mandate. The Affordable Care Act mandates coverage of behavioral health services and federal law requires Medicaid Programs to ensure that recipients have access to services. These two (2) administrative regulations will help ensure that Medicaid recipients are able to access mandated behavioral health services.

(2) Targeted case management ensures that Medicaid recipients with a severe mental illness or with a severe emotional disability are monitored to ensure that they receive the services most beneficial to their particular illnesses. As mental illness can be life-threatening and require long-term treatment, targeted case management gives continuity of care to a Medicaid recipient whose illness needs long-term monitoring. This action must be taken on an emergency basis to prevent a loss of Medicaid federal funds, to meet a deadline for the promulgation of an administrative regulation necessary under federal law and regulation, and so as not to delay providing this service to Medicaid recipients at risk.

(3) This emergency administrative regulation shall be replaced by an ordinary administrative regulation filed with the Regulations Compiler.

(4) The ordinary administrative regulation is identical to this emergency administrative regulation.

REGULATORY IMPACT ANALYSIS AND TIERING STATEMENT

Administrative Regulation: 907 KAR 15:060E

Contact person: Stuart Owen (502) 564-4321

(1) Provide a brief summary of:

(a) What this administrative regulation does: This new administrative regulation establishes the coverage provisions and requirements regarding Medicaid Program targeted case management services for individuals with a severe mental illness or children with a severe emotional disability. This administrative regulation is being promulgated in conjunction with 907 KAR 15:065E (Reimbursement provisions and requirements regarding targeted case management for individuals with a severe mental illness and children with a severe emotional disability.) Targeted case management services are services that assist Medicaid recipients in accessing needed medical, social, educational, and other services. The components of targeted case management include assessing the recipient's need for services by taking the recipient's history, identifying the recipient's needs, and gathering information from other sources (family members, medical providers, social workers, and educators) to form a complete assessment; developing a customized care plan for the recipient; referring the recipient or related activities to help the recipient obtain needed services; and monitoring activities to ensure that the recipient's care plan is implemented effectively and adequately addresses the recipient's needs.

(b) The necessity of this administrative regulation: This administrative regulation is necessary to help ensure that children who have a severe emotional disability or individuals who have a severe mental illness receive necessary services and care. The targeted case manager provider is the individual or entity responding for coordinating the recipient's services/care, facilitating access to services/care, and monitoring recipient's progress or difficulties while receiving services/care. Targeted case management helps ensure that the recipient receives the appropriate and necessary services and care they need rather than randomly receive services/care or fail to receive any services/care at all.

(c) How this administrative regulation conforms to the content of the authorizing statutes: This administrative regulation conforms to the content of the authorizing statutes by helping ensure that children with a severe emotional disability and individuals with a severe mental illness receive necessary services and care.

(d) How this administrative regulation currently assists or will assist in the effective administration of the statutes: This administrative regulation will assist in the effective administration of the authorizing statutes by helping ensure that children with a severe emotional disability and individuals with a severe mental illness receive necessary services and care.

(2) If this is an amendment to an existing administrative regulation, provide a brief summary of:

(a) How the amendment will change this existing administrative regulation: This is a new administrative regulation rather than an amendment.

FEDERAL MANDATE ANALYSIS COMPARISON

Administrative Regulation: 907 KAR 15:060

Contact person: Stuart Owen (502) 564-4321

1. Federal statute or regulation constituting the federal mandate. Section 1302(b)(1)(E) of the Affordable Care Act, 42 U.S.C. 1396a(a)(10)(B), and 42 U.S.C. 1396a(a)(23).

2. State compliance standards. KRS 205.520(3) states: "Further, it is the policy of the Commonwealth to take advantage of all federal funds that may be available for medical assistance. To qualify for federal funds the secretary for health and family services may by regulation comply with any requirement that may be imposed or opportunity that may be presented by federal law. Nothing in KRS 205.510 to 205.630 is intended to limit the secretary's power in this respect."

3. Minimum or uniform standards contained in the federal mandate. Targeted case management services are not federally mandated however, Section 1302(b)(1)(E) of the Affordable Care Act mandates that "essential health benefits" for Medicaid programs include "mental health and substance use disorder services, including behavioral health treatment." 42 U.S.C. 1396a(a)(23), is known as the freedom of choice of provider mandate. This federal law requires the Medicaid Program to "provide that (A) any individual eligible for medical assistance (including drugs) may obtain such assistance from any institution, agency, community pharmacy or person, qualified to perform the service or services required (including an organization which provides such services, or arranges for their availability, on a prepayment basis), who undertakes to provide him such services." Medicaid recipients enrolled with a managed care organization may be restricted to providers within the managed care organization's provider network. The Centers for Medicare and Medicaid Services (CMS) – the federal agency which oversees and provides the federal funding for Kentucky's Medicaid Program – has expressed to the Department for Medicaid Services (DMS) the need for DMS to expand its provider base to comport with the freedom of choice of provider requirement. 42 U.S.C. 1396a(a)(10)(B) requires the Medicaid Program to ensure that services are available to Medicaid recipients in the same amount, duration, and scope. Expanding the targeted case management service provider base to include targeted case management for children with a severe emotional disability or individuals with a severe mental illness will help ensure Medicaid recipient access to these services.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements, than those required by the federal mandate? The administrative regulation does not impose stricter than federal requirements.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements. The administrative regulation does not impose stricter than federal requirements.
